

# Multiply Numeracy Workshops

## Maths and money skills for everyday life

Multiply in Dorset

- ✓ Fully-funded by the Government and therefore **FREE** to you
- ✓ Practical, confidence-building workshops for adults (minimum age 19)
- ✓ Sessions can be tailored to needs and delivered where you are, in our centres or **ONLINE**
- ✓ Straightforward progression pathways onto qualification courses

### Get Number Confident

Maths basics that we use every day presented in a practical and engaging way. This course is designed for people whose confidence with numbers is holding them back at home or at work.

### Get Money Confident

Workshops to support people with the cost of living crisis helping them to understand their spending habits, develop good budgeting skills and find ways to save.

### Get Ready for Functional Skills

For those who need to refresh their skills and build confidence before studying for a functional skills maths qualification at Level 1 or Level 2.

### Need something a bit different?

Talk to us. We can work with you to bespoke the course to the numeracy needs of your group and can include other subjects such as digital skills and English.

"Confidence with numbers is the dominant factor linked to numeracy score, while having a belief you could improve your skills – a 'growth mindset' – was the biggest indicator that your numeracy score would improve."

NATIONAL NUMERACY\*

### Creative Numeracy Workshops

These are what we like to call 'maths by stealth'. Each workshop is 2 to 3 hours and has a creative focus with the numeracy learning embedded. Examples topics include **Cooking on a Budget, Creating a Bug Hotel, Making a Tote Bag** and **Brain Train Numbers**.

We can offer anything from a 45 minute taster to short or long courses, depending on your needs.

## Numbers & Money in the UK

### For speakers of English as an additional language

Aimed at people who are new to the UK, a straightforward and friendly introduction to some of the basic number topics for everyday life including money, measurements and time.

"I can't lie - it's actually pretty good. I thought it was going to be like a classroom and that's what threw me off it, but once I got in there it was completely different. "

**MULTIPLY NUMERACY LEARNER**

## Money, Measuring, Time and Other Numbers

### For people with learning difficulties / disabilities

Building number and money confidence and skills for everyday life, a friendly course for people with learning difficulties and/or disabilities.

## Get Maths Confident for Business

### For self-employed

Short courses for people starting or planning to go self-employed / run their own small business. A friendly introduction to business finance basics for those who need a confidence boost when it comes to maths.
