- ✓ Practical, confidence-building workshops for adults (minimum age 19)
- ✓ Sessions can be tailored to needs and delivered where you are, in our centres or **ONLINE**
- ✓ Straightforward progression pathways onto qualification courses

Get Maths Confident for Work

Basic number skills for people who lack confidence with numeracy or have maths anxiety. Supportive sessions to build back confidence and encourage a positive mindset as a basis for further learning and development.

Get Ready for Functional Skills

For those who need to refresh their skills and build confidence before studying for a functional skills maths qualification at Level 1 or Level 2.

Get Money Confident

Workshops to support your employees with the cost of living crisis helping them to understand their spending habits, develop good budgeting skills and find ways to save.

"A lack of confidence with numbers and data can prevent capable employees from putting themselves forward for development and promotion. Engaging with Multiply... is a way for employers to develop the confidence and skills of their workforce as well as strengthen the future talent pipeline."

NATIONAL NUMERACY*

"Confidence with numbers is the dominant factor linked to numeracy score, while having a belief you could improve your skills - a 'growth mindset' - was the biggest indicator that your numeracy score would improve."

NATIONAL NUMERACY*

Workplace Numeracy

Sessions are completely tailored. We will talk to you about number-based tasks in your workplace and design practical session content around tasks to develop people's skills and competence.

We can offer anything from a 45 minute taster to short or long courses, depending on your needs.
