

Dorset Council Role

*'Clear leadership is needed right across **Government**, with delivery in partnership with business and communities. It must be vital to the **whole of government** and to every level of government in UK'* . Committee on Climate change – May 2019

Direct Action

Reducing Dorset
Council green
house gas
emission

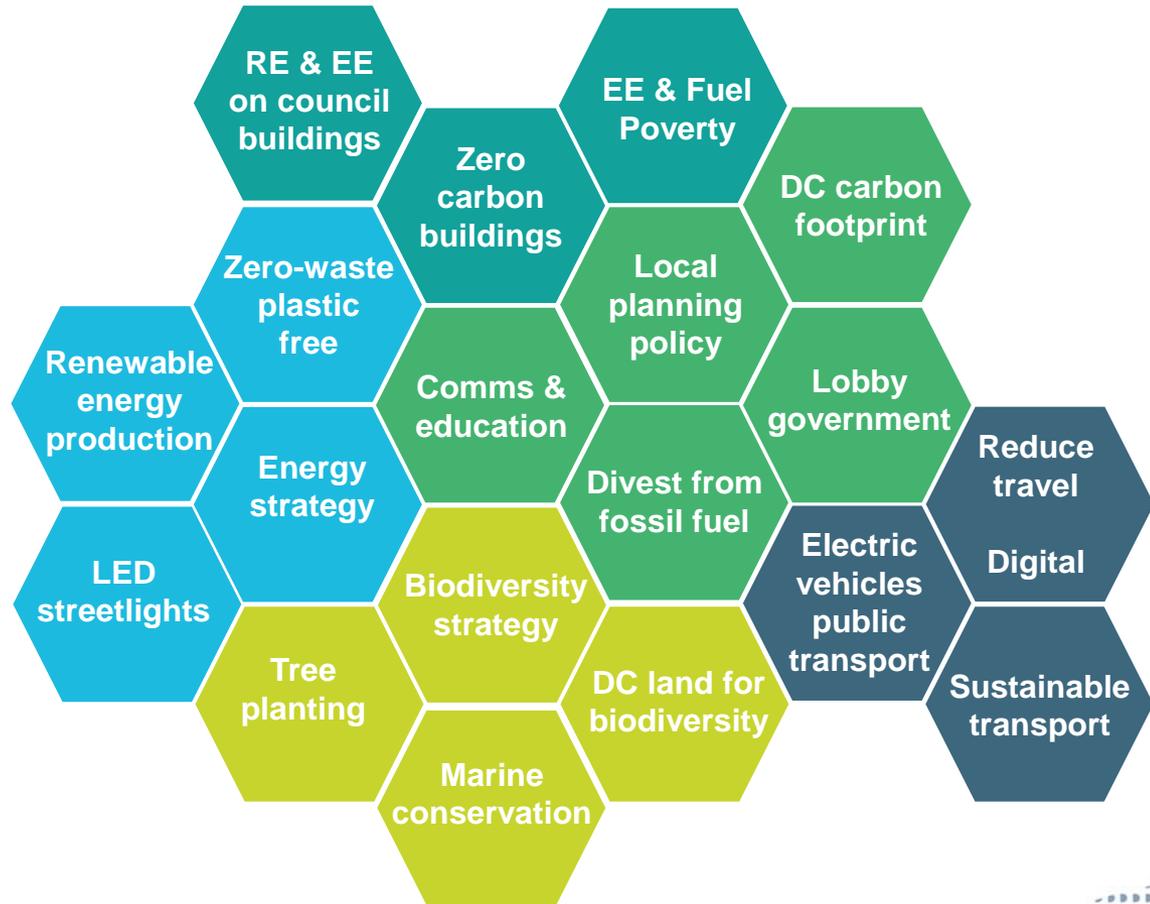

Indirect Action

Influence and
leadership
through wider
services

**Pan Dorset
Partnership**

Councillor priorities

-  Buildings
-  Waste & energy
-  Leadership
-  Transport
-  Natural environment

33 actions for Local Authorities

Actively Progressing

- Top level commitment – Executive Advisory Panel
- EU funding – Low Carbon Dorset (LCD)
- Sustainable travel – Local Transport Plan
- Carshare Dorset
- Active Travel infrastructure
- Electric Vehicle (EV) charging infrastructure
- Tackling fuel poverty – Healthy homes, Eco Flex
- Building Standards enforcement
- Circular economy – Waste strategy
- Low energy streetlighting
- Biogas from Waste
- Small scale district heating through – LCD

Probably not feasible may need further investigation

- Encouraging Electric taxis
- Parking Differential charges
- Green energy company
- Delivery by electric vehicles

33 actions for Local Authorities

Significant Opportunity needs further action

- Carshare Dorset promotion
- Grey Fleet review recommendations
- Local Plan – Positive Policies on range of issues e.g Energy, waste, buildings, transport.
- Housing Energy standards – private rented
- New build energy standards
- Retrofit Council buildings & Schools (strengthen) – **Asset Management plan**
- Sustainable procurement practice
- Influence/work with Local Enterprise Partnerships

Needs further development/investigation

- Electric buses
- Parking policy - Staff and Public
- Renewable Energy on new developments
- **Planning policy**
- Designation of Renewable energy sites in **Local plan**
- Divest from Fossil fuels
- Oppose fracking or other fossil fuel extraction
- Buy green energy
- Council land – carbon sink, afforestation/energy crops
- Sub-national transport – Western Gateway

Headings & Areas

| Leadership & Influence | Transport | Buildings | Waste & Energy | Natural environment |
|--------------------------|-----------------------------|-------------------------------|---------------------------|--------------------------|
| Political commitment | Sustainable transport plans | Energy Stds in rented housing | Zero waste | Ecological emergency |
| Plans of zero carbon | EV infrastructure | Higher building standards | Circular economy waste | Farming & food |
| Raising funds | EV Fleet | Fuel poverty | RE in local plan | Tree planting on DC land |
| Comms and Engagement | Active Healthy travel | Retro fit DC property | Streetlighting LED | |
| Influence others e.g LEP | Public transport | Enforce energy building stds | Buy /produce green energy | |
| Sustainable procurement | Car Sharing | Planning policy | Large Scale RE projects | |
| Sub national transport | Local Plan | | RE in new build | |
| Carbon Baselines | | | | |

Initial plan development

Questions for each area

- What do we need to do
- What are we currently doing
- What could we be doing
- What are the GAPS
- What are the barriers/issue

Aim to identify

- *Scale of the issue*
- *What will it achieve*
- *What will it achieve - £ - when*
- *What else do we need to know*
- *What is stopping us*

An approach
