

**EXISTING**

- 65no Trees to be felled on the advice of the Arboricultural Consultant. This number includes the Community Hall site. Felling recommended due to major decay, structural problems or deadwood. Tall stumps may be retained for habitat creation
- 25no Additional trees to be felled to achieve the landscape masterplan objectives for the gardens. Count does not include the Community Hall site
- 7no Trees recommended for felling by the Arboricultural Consultant but retained for habitat and aesthetic reasons. Will require tree surgery
- 200no Trees to be retained. Subject to tree surgery as recommended by the Arboricultural Consultant.

Tree Survey information supplied by Scott Tree Services Ltd  
212 New Road, West Parley, Ferndown, Dorset, BH22 8EN.  
Surveyed in compliance with BS5837 - Trees in relation to Construction

Tree Quality Categories	
	Category A High quality and value. Able to make a substantial contribution for 40 years
	Category B Moderate quality and value. Able to make a significant contribution for 20 years
	Category C Low quality and value. Adequate condition with low potential. Small trees
	Category R Trees to be removed. Now or near future for sound arboricultural management.
	Root Protection Radius Work within radius to be subject to special methods and arboricultural supervision.

Existing tarmac footpaths

Existing mud paths

**PROPOSED**

FOOTPATHS - new footpaths to be resin bound gravel finish. Hard wearing and natural colour with small unit edgings. All footpaths to be constructed "No-Dig" to prevent any damage to roots of existing trees.

DIRECTIONAL SIGNAGE - located at entrances and junctions to encourage movement through Drutt Gardens

TIMBER BOLLARDS marking the line of the Saxon Burgh defences and the Medieval boundary running through the gardens. Supported by interpretation boards at footpath junctions and focal points

GATEWAY FEATURE - entrance features to announce Drutt Gardens and invite visitors into the site.

FOCAL POINTS to draw user through the gardens  
To include:  
Special paving, seating, lighting, sculpture, signage, archaeological interpretation

SEATING AREAS

BOLLARD LIGHTING  
1m high waymarking lights. Low light levels for wildlife

LED LIGHTING  
Ground level white uplighters providing lighting accents at focal points and junctions.

FEATURE LIGHTING  
Spot and uplighting for Gateway Features, information, and artworks.
