

Plan for 2020 to 2024

Welcome

This plan is about what we want to happen in Dorset from 2020 to 2024.

We are working with communities and partners like the NHS to make things happen.

We are careful with how we spend our money so we can offer services to help people in the best way.

We make sure we train our staff and support them so they can do their jobs well.

We want to make Dorset a great place to work so we need to:

Support businesses to grow and then they can employ more people.

Make sure people have the training they need to get good jobs.

Help Dorset to have good broadband and mobile phone networks.

Make public transport better and help the environment.

How we will look after our beautiful countryside and coast.

We will work with lots of other organisations to look after the environment like the Dorset Local Nature Partnership.

We will make access to the countryside and coast better but make sure it is still protected.

We need to make sure that all Dorset communities work with us to respect the environment.

We want to help the environment by supporting businesses that work on renewable energy.

To make sure people get the sort of housing they need we will:

Work with lots of other housing organisations like local housing providers, Homes England and house builders.

Support people to get the right housing using our Building Better Lives programme.

Help more people to use Healthy Homes Dorset who help residents make their homes warmer.

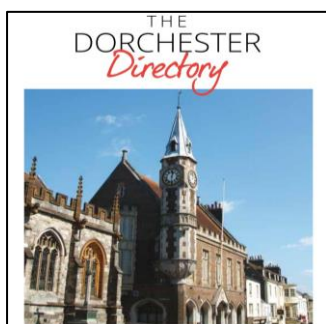

Make sure that there are homes that people can afford to buy.

We want Dorset people to live in strong and healthy communities.

We will work with local councils and communities all over Dorset to find out what services people think are important to have and give support to make them happen.

Good communication is important so we will make a list of things to do in Dorset communities that everyone can take part in and not feel lonely.

We want to connect communities in Dorset with better transport and support community transport schemes.

We want to support everyone in Dorset to have healthy and active lives. LiveWell Dorset can help with this.

We will work with Dorset people so they can stay safe and well.

We want to make social care, education and health services better by working with our NHS partners on the 'Our Dorset' partnership.

We want all Dorset children and young people to get the best education so they can get the best out of life.

We will help to protect Dorset children and vulnerable adults so that they are safe.

We will support older people and disabled people to live independently in their own homes and make sure there is high quality care when they need it.
