

*blandfordplus*

## Here and now

is when you have the opportunity to be involved and discuss what kind of Blandford + area you want for your children.

Should a new sewage works be built beside the Stour to accommodate waste from new housing developments?

Should Blandford have a new hotel built on the site of the allotments?

Should the Blandford + area be surrounded by wind turbines?

Should Bryanston have a new area for small factory units to increase employment opportunities?

Does Blandford need another doctor's Surgery, if so, where?

The Blandford + group have set up five smaller groups to talk about and recommend what Blandford + needs to shape future development.

**You can join** one or all of the groups.

Environment (historic and natural)

Green (renewable energy)

Housing (design and type)

Development (all types)

Infrastructure

**We NEED people** of talent to contribute.

Please contact the Chairman of Blandford +, Cllr Sara Loch using the details below, to make your difference!
