

## Appendix C - Submitted / Identified Large Sites with Development Potential

The potential supply from Submitted / Identified Large Sites is 10,033 units (net). However some 6,199 units are outside defined development boundaries (and only deliverable subject to policy change), giving a supply of 3,834 units (net).

Of these units, 1,568 units are likely to be provided in the first five years, which gives a net total of 1,411 units (with 10% lapse applied).

Source	Method of Assessment	Avoiding Double Counting
<p><b>Submitted / Identified Large Sites with development potential</b></p>  <p>Site submitted via public / stakeholder consultation (sites of any size), including all previously submitted sites.</p> <p>Sites identified by council officers from known surplus / underutilised / vacant land and buildings.</p> <p>Sites identified by council officers through previous Urban Capacity Studies that are equal to or greater than 0.15ha.</p> <p>Sites identified by council officers through pre-application proposals for residential development prior to April 2014 where no</p>	<p>➤ Sites were identified from a range of sources and mapped. Sites wholly unrelated to any town or village were excluded, unless they were put forward for affordable housing (see Appendix E)</p> <p>Sites wholly affected by the following constraints were then excluded without any further assessment:</p> <ul style="list-style-type: none"> <li>○ Site of national nature conservation or geological importance (SSSI) or higher, and sites within 400m of internationally protected heathland sites</li> <li>○ Scheduled monuments</li> <li>○ Flood Risk Zone 3 (undefended)</li> <li>○ Land Instability Zone 4 (unsuitable because of land slipping and/or coastal erosion)</li> </ul> <p>The remaining sites were assessed by the Landscape Officer if the site extended into open countryside. Sites were excluded at this stage on the grounds of significant landscape harm.</p> <p>All the remaining sites were then assessed by the Urban Design Officers. Sites were excluded at this stage on the following potential grounds:</p> <ul style="list-style-type: none"> <li>○ Where any form of development would have been significantly out of character with the local area</li> <li>○ No feasible highway access</li> <li>○ Topographical constraints indicated that there was unlikely to be any development potential</li> <li>○ Contaminated land where it was known that there was no potential mitigation</li> </ul> <p>Sites assessed as having no potential are listed in Appendix I.</p> <p>➤ Site characteristics and owner expectations (where known) were considered to inform the deliverability of the site. Site constraints / characteristics and local character were assessed to provide an estimated net yield based on an assumed</p>	<p>Each site was mapped and checked for duplication with other sources, i.e.:</p> <ul style="list-style-type: none"> <li>– Site allocations</li> <li>– Sites with extant planning permission</li> <li>– Minor identified sites</li> </ul>

significant issues have been identified to date

dwelling density. A summary of the findings from these assessments is provided in the individual site forms.

- All sites with development potential that are located within the defined development boundaries contribute to the overall housing land supply. Sites assessed as having development potential that are located outside the defined development boundaries (and therefore would require a policy change) have not been included in the housing land supply.
- An additional review was made in relation to the large sites assessed that fall within the Weymouth Town Centre masterplan area. Altogether the site assessments indicate that it is feasible that they could deliver in the region of 1,000 new homes over the next 15 years. However in terms of the figure included in the housing land supply, a more precautionary approach has been adopted. The overall number from this source included in the land supply has been reduced to 600 homes (pro-rata), which is considered to be a reasonable estimate at the current time. This figure will be reviewed following the completion of the town centre strategy, which will provide a further opportunity to check likely yields and delivery timeframes.
- For inclusion within the 5 year supply, availability and deliverability within this timescale was also checked with the landowner / developer. In addition, a 10% discount for non-delivery is applied. This is double the lapse rate on planning applications (see Appendix A).

The following tables set out the development potential and estimated timescales for delivery (STPC = timescale unknown as development would be subject to policy change)

**Table C.1: West Dorset Sites with Development Potential**
