

BACKGROUND INFORMATION

Introduction

This document outlines the main background information (other than existing published research) that helped inform the Planning Obligations supplementary planning document, in February 2010. In particular, it covers:

- Public Open Space
- Culture and leisure facilities
- Transport
- Education

This information will be checked on an annual basis and if appropriate updated and used to inform development control decisions.

Where ‘quality’ is highlighted in the following tables, it indicates that the quality of the infrastructure provided falls below the recommended standards given in the PPG17 audit.
