Appendix B: Post Consultation - New Policy Appraisal Matrix

The following table details the full appraisal carried out on those policies requiring further SEA Appraisal following consultation of the Draft LTP3. Appendix A compares the draft LTP3 polices against the final LTP3 policies and highlights where further SEA Appraisal was required.

The appraisal methodology considered whether the impacts, would be: direct, secondary, synergistic, cumulative, short term or long term and whether these impacts will be local, regional or national. There are occasions when not enough information has been provided to score either negative or positive or a number of positive and negative impacts are identified and therefore the overall score is uncertain.

Ţ	Local net positive impact	↑ ↑	Regional net positive impact	↑ ↑ ↑
¢	Local uncertain or combination of positive and negative impacts			
Ļ	Local net negative impact	↓↓	Regional net negative impact	↓↓↓

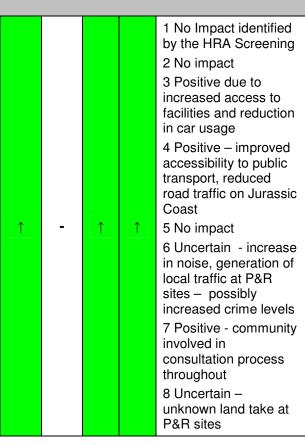

Widespread net positive impact Widespread net negative impact

 LTP G-1 Transport improvements promoted through the LTP should seek to protect, enhance and manage the rich diversity of the historic environment and landscape, including sites and features of architectural and archaeological value, and to maintain and strengthen local distinctiveness and sense of place in both urban and rural areas. This will include: i. seeking to ensure high standards of responsive design ii. mitigating the cumulative impact of small scale changes to the character and appearance of any designated landscape, historic area, or heritage asset and its setting 	-	-	-	-	-	-		-	-	-	-	-	-	-	-	-	-				1 to 6 No impact 7 Positive - community involved in consultation process throughout 8 to 18 No impact 19, 20 Positive – promoting protection, enhancement and management of cultural heritage and landscape assets, regionally and locally
4 PUBLIC TRANSPORT ALTERNATIVES TO THE CAR																					

LPT3	H-5													
worki	uthorities will seek to increase the role of rail travel in the sub-region, ng closely with the Train Operating Companies, Network Rail and the nment, including by:													
i.	Improving rail stations to promote Park & Ride journeys by rail at suburban and rural stations with identified demand, and to act as a focus for other changes of transport mode													
ii.	Seeking to improve the integration of rail with other modes of travel for both local and longer distance journeys, including connections to the wider national networks													
iii.	Seeking to secure enhanced frequency, capacity, reliability and connectivity of the railway to meet passenger needs and enhance the role of rail freight	-	-	$\uparrow\uparrow$	<u> </u>	-	\$ $\uparrow \uparrow \uparrow$	\$ \$	\$ <u> </u>	<u> </u>	\$ $\underline{\uparrow\uparrow}$	<u> </u>	$\underline{\uparrow\uparrow}$	
iv.	Continuing to improve access to, and facilities at, rail stations based on results of access audits, and through working with train operators to deliver Station Travel Plans													

LTP3 Policies																					
	Environmental		Social					Environmental						Economic					Environmental		
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	
																					9, 10 Uncertain – unknown proximity of schemes to watercourses and floodplains 11, 12 Positive – reduction in emissions and improved air quality due to reduced car dependency 13 Uncertain – P&R needs to include SUDS 14 Positive – improved network and access to facilities 15 Positive – improved access to tourism by sustainable transport – although private car use is promoted with use of P&R's 16 Positive – better accessibility and connectivity for rail freight 17 Positive - rail is a better use of fuel than cars 18 No impact 19 Positive - reduced highway congestion will benefit historic environment 20 Positive - reduced highway congestion will benefit landscape
LTP H-7 The authorities will promote and support the development of waterborne passenger transport services along the Jurassic Coast. Potential impacts on the marine and coastal environment will be avoided through mitigation and	¢	¢	¢		-	-	<u>_</u>	-	\$	-	-	-	-	<u> </u>	<u> </u>	-	¢	-	\$	¢	and townscape 1 Uncertain - possible disturbance of designated / protected sites 2 Uncertain – needs to

																					natural resources, will sustainable design and construction techniques be employed? 19, 20 Uncertain – schemes must ensure no harm to historical environment, landscape or townscape at scheme level
GENERAL POLICY – ALL TRANSPORT IMPROVMENTS						_	-					_						_			
LTP- GEN3 All transport policies and proposals supported through the LTP3 will seek to develop transport improvements in ways that minimise environmental impacts and avoid direct and indirect negative impacts on the conservation objectives of environmental designations, including European (Natura 2000) sites. Any proposal that would be likely to have a significant effect on European sites, either alone or in combination with other plans and projects, will be subject to assessment under Part IV of the Habitats Regulations at project stage		↑ ↑	Ť	-	-		$\uparrow \uparrow \uparrow$	-	-	-	-	-		1	¢	\$	-		-	↑ ↑	 Positive – will ensure no harm to biodiversity at designated sites Positive – will limit local loss of habitat Positive – will reduce loss of open space 5, 6 No impact Positive - community involved in consultation process throughout to 13 No impact 14, 15, 16 Negative – transport development and improvement could be limited, access to facilities would not be improved for local residents, tourists, or major infrastructure 17, 18, 19 No impact Positive – will protect landscape
