The penultimate paragraph of page 5 mentions biodiversity and the site allocations (HSA1-3) pick up the requirement for biodiversity mitigation in their site-specific criteria, as well as the measures identified in the ecology surveys.

Whilst the plan relies therefore, page 5, on Local Plan and national policy it is considered that it would be clearer, and simpler in not relying on a reader having to refer to such LP or national policy if text or policy be introduced to ensure the Plan complies with national and international legislation such as the Wildlife and Countryside Act, 1981 and the Conservation of Habitats Species Regs, 2017.

Similarly The NERC Act, 2006, confers a duty to consider biodiversity through planning and it would be expected that a Neighbourhood Plan would contain information on what protected/priority species and habitats are contained within the Plan area as well as information on how impacts on species/habitats will be avoided, mitigated and compensated for (including enhancements), in line with NPPF, 2012.

Any development must be assessed through the Dorset Biodiversity Appraisal Protocol and the Dorset Compensation Framework as these processes will ensure that impacts on wildlife will be avoided, reduced or mitigated against, while securing compensation as a last resort where there is still residual loss The Plan should mention these processes as part of the consideration of protection of biodiversity.
