Dear Sirs

Re: NPPF - Core Strategy - Section 2.2.1

With reference to the above I reply as follows:

My brother and I own 6 acres in total at Deans Drove and Foxhills Lane, Lytchett Matravers one acre I have stated would be suitable for infill development but the remaining could be used for horticultural use.

Now in these difficult economic times a small development would probably be build by a local builder, which would create local jobs. We suggest that the remaining land and the agricultural shed, which as been there since 1981 approximately could be used for horticultural use which would also create local employment, but we are still willing to give to the village one acre for an open space.

The land we are offering to the village cannot stand for ever, as my brother and I are at an age when we may have to sell for our own economic use, and a new owner may not be so generous.

Yours faithfully

Fenella Burbidge (Miss)
