Subject: RE: Planning application P/FUL/2023/05051

Hello Rob,

Sorry I forgot to include the following message in my previous email with regards to the above application. The proposed development is located within an EA source protection zone 3. The applicant is proposing infiltration-based SuDS and as such I thought you might want to run these proposals by the Environment Agency (if you haven't already) to see if they have any comments.

However you will see that from the point of view of the LLFA we have no objections to these proposals and just ask that you include our regular conditions.

Many thanks
Rob Hanson.
