

Dorset Local Plan
Potential Development Locations
Ecological Data
PART 1: Introduction and keys to maps

This report is Part 1 of five reports designed to present an ecological baseline for potential development locations that will inform the production of the Dorset Council Local Plan. The reports are set out as follows:

PART 1: Introduction and keys to maps

PART 2: Central Dorset

PART 3: Northern Dorset

PART 4: South Eastern Dorset

PART 5: Western Dorset

This report refers to opportunity sites included in the 2025 Dorset Council Local Plan options consultation, and potential alternative development locations submitted to the Council through the consultation. Inclusion of a site in this report does not imply that the site will be or has been allocated in the emerging Dorset Council Local Plan.

Report prepared for:		Dorset Council	
Version control:		Contract number: C25157 (Part 1)	
1.0	Report prepared by:	Carolyn Steele & Hugo Sewill	03/08/2026
	Checked:	CS	04/08/26

Purpose of the reports

The reports have been commissioned by Dorset Council in preparation for the Dorset Local Plan and relate to opportunity sites included in the 2025 Dorset Council Local Plan options consultation and potential alternative development locations submitted to the Council through the consultation.

This report, Part 1, sets out the methodology used to prepare the data with an explanation on the layout of the individual reports including keys to the maps. There is a list of the settlements within each functional area (Appendix 1) with an overview map of each settlement in Appendices 2-5.

Reports in Parts 2-5 collate and present ecological data for each potential development location. They provide an ecological baseline based on data held by Dorset Environmental Records Centre (DERC) with additional data from the Dorset LNRS. The reports do not provide conclusions on whether a site is suitable for development in ecological terms, as this would be subject to further consideration. Inclusion of a site in any of the reports does not imply that the site will be or has been allocated in the emerging Dorset Council Local Plan.

The reports have been produced by DERC which is one of a network of Local Environmental Records Centres across the UK. DERC covers the county of Dorset, including the administrative areas of Dorset Council and Bournemouth, Christchurch & Poole Council. The main purpose of the records centre is to collect, collate, manage and provide ecological data for the county. To that end, DERC currently has a database with over 4.3 million records and provides a service to local authorities, statutory agencies, ecological consultants, conservation organisations, local naturalists and members of the public.

Methodology and report format

Dorset Council has provided boundaries for development opportunity sites included in the 2025 Dorset Council Local Plan options consultation, as well as potential alternative development locations submitted to the Council through the consultation, with basic information on each site including the site reference number, site name, allocation type and functional area. The boundaries have been grouped within functional area and settlement with more detailed information collated for individual sites as set out below.

All maps have been produced by DERC under OS licence AC0000830671 for Dorset Council. The maps include data provided by DERC and the Dorset Local Nature Recovery Strategy.

Under the OS licence users are permitted to use this data solely to enable people to respond to, or interact with, the organisation that provided the data. They are not permitted to copy, sub-licence, distribute or sell any of this data to third parties in any form.

Settlement maps show the following:

LNRS: Nature areas of national importance and High opportunity nature areas

Dorset's Local Nature Recovery Strategy (LNRS) is a ten year framework that sets shared priorities for nature recovery and maps opportunities in Dorset. Three mapped layers make up the Local Habitat Map: Dorset's nature areas of national importance, Dorset's high opportunity areas and Dorset's potential activities.

In these reports Nature areas of national importance and High opportunity nature areas are shown on the settlement maps. Information on Potential activities is shown in the tables below the maps under LNRS: opportunity for environmental benefits / ecosystem services from habitat creation.

The online version of the LNRS Local Habitat Map also includes Land manager and project proposals alongside other useful data sets. Further information on the LNRS and the data sets used can be found online: [Dorset LNRS](#)

The maps shown in the reports may look slightly different to those on the website where Sites of Nature Conservation Interest (SNCI) are shown as green dots. Boundaries for SNCI (or County Wildlife Sites) are not generally available to the public and could not be included in the online LNRS version or within the LNRS downloadable data set, but they are important in the context of site assessments and so included in the following reports.

Priority Habitats

Priority Habitats, or habitats of principal importance for biodiversity, are designated under Section 41 of the NERC Act 2006 and must be considered by public authorities in their decision-making. Priority Habitats have been identified as those most under threat, or of importance for species of particular conservation concern, and requiring positive conservation action. Most areas of Priority Habitat are covered by other designations such as SAC, SSSI or SNCI but the maps will show areas where this is not the case.

The Priority Habitats shown on the maps are based on DERC data (updated April 2026). A key to the habitats is provided below.

Maps for potential development locations show the following:

Ecology, Geology and Landscape Sites Map

These maps show international, national and local sites. The full list is shown in the key below. Mapped SNCIs include boundary amendments following the SNCI panel meeting in September 2025.

LNRS: Habitat and ecological networks

These layers provide an idea of the current functional connectivity of semi-natural habitat and possible areas to expand habitats and increase connectivity. They are based on a combination of existing habitat mapping, remote sensing and modelling. Further information on the LNRS can be found online: [Guide to Dorset's nature recovery maps - Dorset Council](#)

Each pair of maps is followed by a set of tables as follows:

Possible constraints

SPD zones show where sites fall totally or partly within heathland, recreation or nutrient catchment zones with Supplementary Planning Documents (SPD). Nutrient catchment zones include the River Avon SAC (**Avon**), River Axe SAC (**Axe**), Poole Harbour SPA/Ramsar (**PH**) and the Somerset Levels & Moors (**Parrett**).

LNRS: opportunity for environmental benefits/ ecosystem services from habitat creation show where sites fall totally or partly within the opportunity areas. These include opportunities for carbon storage, air quality regulation, cooling & shading, flood risk regulation, water quality regulation and water availability. If a site is within an opportunity area, it does not mean that it is not already providing an ecosystem service, only that habitat change may be able to provide more environmental benefits. Further information on the environmental benefits/ecosystem services can be found online: [Guide to Dorset's nature recovery maps - Dorset Council](#)

A list of adjacent sites recognised for their ecology, geology or landscape interest, this includes international, national and local designations. Sites are considered adjacent if they share a boundary or are immediately across a road or river. If a potential development location is within the boundary of a National Landscape, or a site falls within or partly within, the potential development location boundary, the information is included here. The sites will match with the Ecology, Geology and Landscape Sites Map.

Species Data. A species check for each site summarises post-2014 records for S41 species plus all bat species. Some species data held by DERC is very precise (within 10m or 100m) whilst other species records have a lower resolution (1km). To extract the data buffers were created around each site at 100m and 1km. The centroid for each record has been used to determine the location. The records have been presented as a summary list of species within the site, within 100m or within a 1km buffer.

Where there is a known bat roost within the site or a 100m buffer, the relevant information has been summarised. **BR** refers to a bat roost with post-2014 bat records. **OBR** refers to a bat roost with older records.

DERC has over 4.3 million records including many records of rare and notable species. This is a valuable resource and all data submitted to DERC goes through a process of verification and checks before being added to the database. This takes some time so there will be fewer records from recent years.

Most species names are written in full, but a few have been shortened as shown below.

Key to settlement maps

LNRS: Nature areas of national importance
& High opportunity nature areas

Nature areas of national importance

High opportunity areas

Key to Priority Habitats

	Lowland mixed deciduous woodland
	Wet woodland
	Lowland dry acid grassland
	Lowland calcareous grassland
	Lowland meadows
	Lowland heathland
	Purple moorgrass and rush pasture
	Lowland fens
	Maritime cliff and slope
	Coastal sand dunes
	Coastal vegetated shingle
	Coastal saltmarsh
	Reedbeds

Key to site maps

Please note that where ecology/geology/landscape sites overlap it can change the look of the colour coding. This happens particularly where the green of the National Landscape underlies another colour code. The maps use different scales depending upon the size of the location and this can also affect the appearance of a site. To assist, alternative views/colourways are shown below for National Landscape and for instance where SNCI overlap with National Landscape, Habitat Restoration Site, Ancient Woodland and Long Established Woodland.

International Sites

Ramsar (wetlands of international importance)

Special Area of Conservation (SAC)

Special Protection Area (SPA)

World Heritage Site (WHS)

National Sites

National Nature Reserve (NNR)

Ancient Woodland

Ancient semi-natural woodland (ASNW)

Plantation on an ancient woodland site (PAWS)

Cleared ancient woodland site

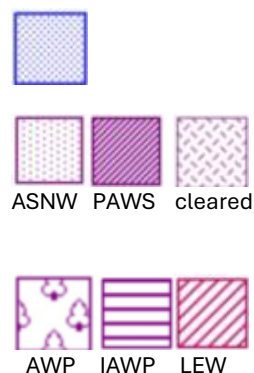

Ancient wood pasture (AWP)

Infilled wood pasture (IAWP)

Long established woodland (LEW)

National Landscape

Site of Special Scientific Interest (SSSI)

Local Sites

Butterfly Conservation Reserve

DWT Reserve

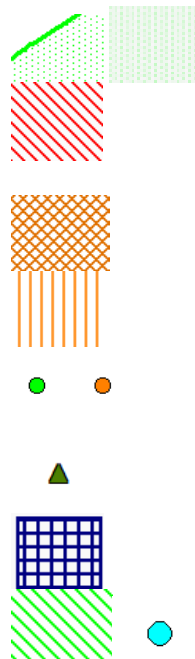

GCN pond

recent records – older records

Greenwood Trees

Habitat bank

Habitat Restoration Site
site - pond

Important Veteran Tree Site

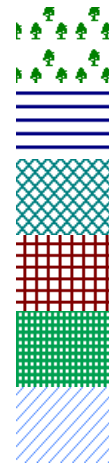

Local Community Nature Reserves (LCNR)

Local Geological Sites (LGS)

Local Nature Reserve (LNR)

RSPB Reserves

Site of Nature Conservation Interest SNCI
(the year of the last assessment is given in brackets)

National Landscape & SNCI

Habitat Restoration Site
& SNCI

Ancient woodland & SNCI

Long Established Woodland
& SNCI

Administrative boundaries

Dorset County boundary

BCP Council / Dorset Council

LNRS: Habitat and ecological networks

Heathland 5km

Wetland 5km

Woodland 5km

Grassland 5km

Species abbreviations:

GCN = Great Crested Newt

SL = Sand Lizard

SS = Smooth Snake

BLE = Brown Long-eared Bat

Com Pip = Common Pipistrelle

GLE = Grey Long-eared Bat

LE = Long-eared Bat

Nath Pip = Nathusius's Pipistrelle

Sop Pip = Soprano Pipistrelle

Ser = Serotine

Bat Roosts

BR – bat roost with recent records (post-2014)

OBR – older bat roost (with pre-2015 records)

Appendix 1: List of settlements and functional areas (A-Z)

Settlement	Functional area
Aldersholt	South Eastern Dorset
Beaminster	Western Dorset
Bere Regis	South Eastern Dorset
Bishop's Caundle	Northern Dorset
Blandford	South Eastern Dorset
Bourton	Northern Dorset

The map displays the following ward boundaries and labels:

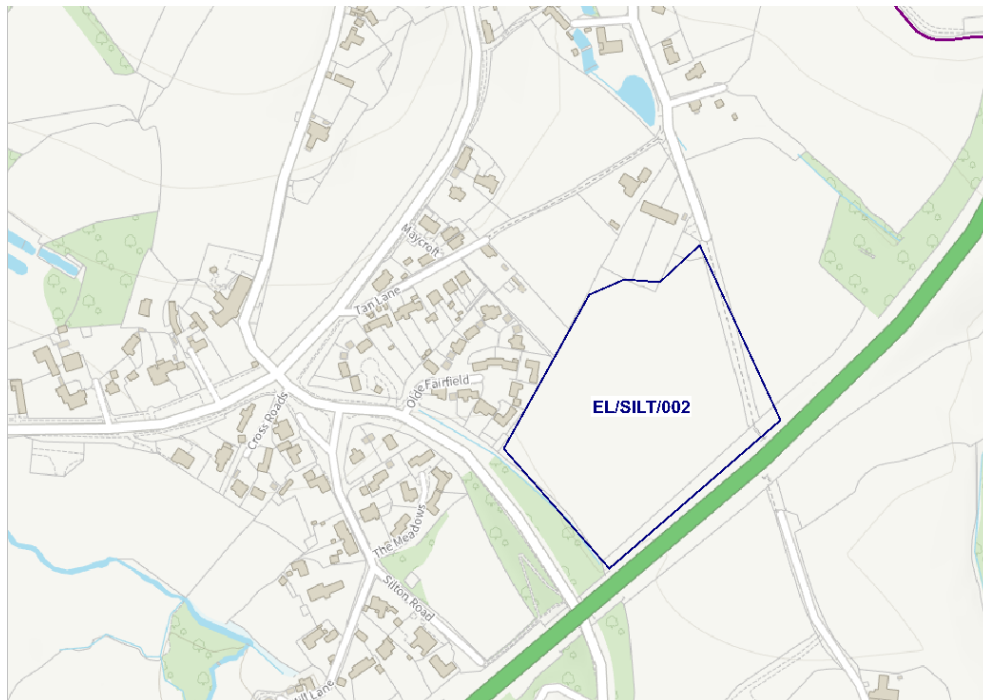

- LA/SHER/001**: A large ward in the northwest, including areas like Sherborne Valley House and New Barton Farmhouse.
- LA/SHER/004**: A ward located south of LA/SHER/001.
- LA/SHER/005**: A ward located south of LA/SHER/004.
- LA/SHER/006**: A small ward located south of LA/SHER/005.
- LA/SHER/010a**: A small ward located east of LA/SHER/001.
- EL/SHER/009**: A ward located in the northeast, including areas like Gainsborough Lodge and Gainsborough Dairy House.

The map displays the town of Shillingstone with three designated allotment sites highlighted in blue. Site LA/SHIL/003a is located to the north of the town center, near the Playing Field and Tennis Court. Site LA/SHIL/003b is situated to the east, adjacent to the Allotments and Holloway Lane. Site LA/SHIL/003c is located to the south, near the Shillingstone Church of England (Voluntary Aided) Primary School and White Pit. The map also shows various roads including Gun Lane, Wessex Avenue, and Blandford Road, as well as other local features like the Spencer Gardens and Play Space.
