

Dorset Local Plan
Potential Development Locations
Ecological Data
PART 3: Northern Dorset

This report is Part 3 of five reports designed to present an ecological baseline for potential development locations that will inform the production of the Dorset Council Local Plan. The reports are set out as follows:

PART 1: Introduction and keys to maps

PART 2: Central Dorset

PART 3: Northern Dorset

PART 4: South Eastern Dorset

PART 5: Western Dorset

This report refers to opportunity sites included in the 2025 Dorset Council Local Plan options consultation, and potential alternative development locations submitted to the Council through the consultation. Inclusion of a site in this report does not imply that the site will be or has been allocated in the emerging Dorset Council Local Plan.

Key to site maps

Please note that where ecology/geology/landscape sites overlap it can change the look of the colour coding. This happens particularly where the green of the National Landscape underlies another colour code. The maps use different scales depending upon the size of the location and this can also affect the appearance of a site. To assist, alternative views/colourways are shown below for National Landscape and for instance where SNCI overlap with National Landscape, Habitat Restoration Site, Ancient Woodland and Long Established Woodland.
