

Changes to Day Services: What do you think?

North Dorset 2025

Tell us what you think

We want to know what you think about our plans. Read this booklet then fill in our survey.

Here is a link and a QR code for the online survey:

Why do we need to change things?

About 600 people need a day service which is paid for by Dorset Council.

More than 300 of these people go to a day centre. The buildings are owned by Dorset Council.

- Many of the buildings are too big.
- Some need to be improved.
- Some are not very accessible.

Day services do not have to happen in these buildings.

We want to give more people more **day opportunities** instead: interesting activities in their local town or village.

Our plans

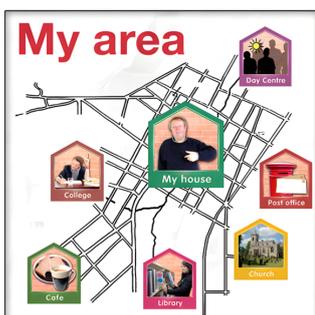

Our plans use the idea of **hubs** and **spokes**.

Imagine a bicycle wheel! The **hub** is in the middle. The **spokes** are the thin sticks of metal, reaching out from the hub.

Dorset is divided into these 5 areas.

There will be 1 **hub** in each area.
There will be lots of day opportunities all over that area. These are called the **spokes**.

Hubs

A **hub** is a building where activities can be run and organised. There could be:

- advice and information
- equipment for people to take home

- staff who organise community activities and training
- space for community organisations to work in

- support for health and wellbeing
- support for carers

Spokes

Spokes are day opportunities in towns and villages.

Here are some examples:

- gardening, cooking, arts and crafts

- lunch clubs

- swimming pools and leisure centres

- libraries

- dementia support

- support with benefits, housing, working and volunteering

Specialist services

Specialist services are based in the hubs and other places.

A specialist service can support people who need, for example:

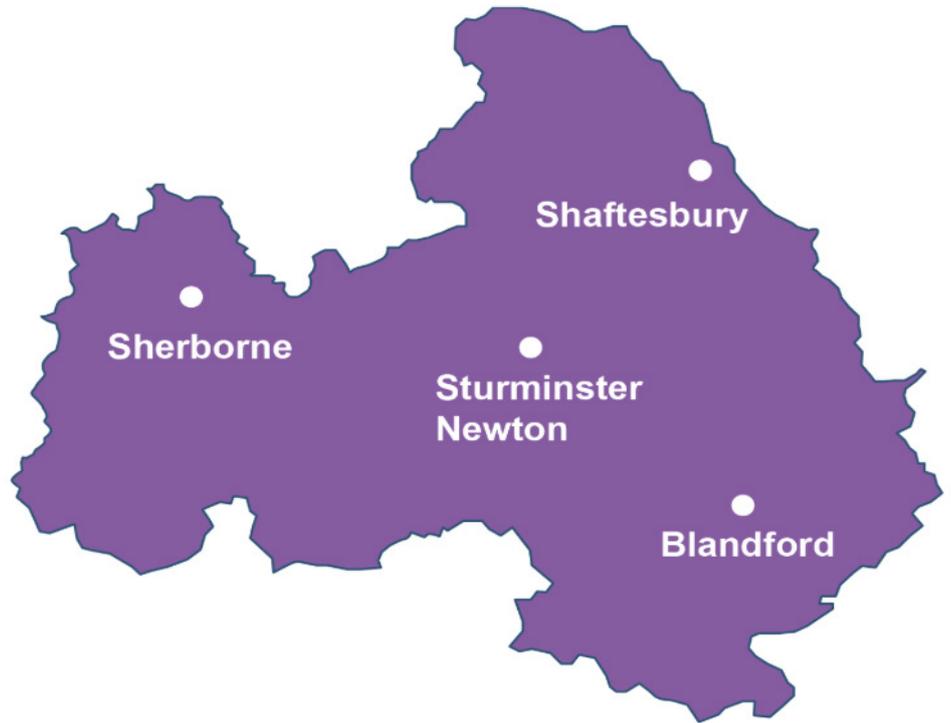

- physiotherapy
- speech and language therapy
- hoists
- adapted furniture and toilets
- sensory room
- hydrotherapy pool

Staff in specialist services will be trained to do activities with people who need a lot of support.

About North Dorset

At the moment there are 4 day services. They are run by Care Dorset.

Sturminster Newton: Stour Connect

Sherborne: Sherborne Connect

Shaftesbury: Shaftesbury Plus

Blandford: Blandford Connect

Sturminster Hub

Our plan:

Stour Connect will be the hub for North Dorset.

It has good facilities, including a hydrotherapy pool.

It has lots of car parking.
The building is accessible.

Some ideas:

Care Dorset will run the hub for now.

Involve the Friends of Stour Connect and community partners in planning changes.

Run lunch clubs, health clinics and classes for a wider range of people.

Invite other organisations to use the rooms and facilities.

North Dorset spokes

Our plan is to close day service buildings that are too big, not accessible, or in the wrong place.

We will encourage organisations to run more activities in local communities.

Sherborne

Close Sherborne Connect and run community activities in other places.

Blandford

Move Blandford Connect to a smaller building in the middle of Blandford.

Shaftesbury

Close Shaftesbury Plus and run more activities from other buildings in Shaftesbury.

What this means for you

You will get support to decide what you would like to do. Think about:

- things you want to learn and achieve
- activities you would like to keep doing, and new things you want to try

You could choose to:

- go to the hub in Sturminster Newton

- do activities in your village or local towns

- use a specialist service if you need more support
- a mix of all these options

Paying for day opportunities

If you might need support from Dorset Council, you can have an assessment. This helps the council to decide how much support you can get.

Your day opportunity can be paid for in a few different ways:

- **Commissioned service:** the council pays for your support
- **Direct Payment:** the council gives you money to organise your own support
- **Individual Service Fund:** the council gives the money to a care organisation to manage.
- **Self-fund:** pay for it yourself
