

Session 38: Whether the remaining plan policies promote sustainable development . . .

Future Proofing

East Dorset Friends of the Earth raised the question of future proofing in MSP 153, MSP150. This is not about safeguarding (although this might be part of the solution) but rather about sustainability. Although I said I did not know whether I wanted to appear on that issue I now feel we have something to say on this matter. Can this be included in Session 38 ?

Clifford C. Morse
