Summary of 2018	14

Introduction

1. Purbeck District Council produces an annual five year housing land supply report in accordance with the requirements of the National Planning Policy Framework (NPPF) (March 2012). Paragraph 47 of the NPPF requires local planning authorities to:
 - a. “Identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land”.
2. The remaining text of paragraphs 47-49 of the NPPF sets out further five-year supply requirements in relation to persistent under delivery, windfall site allowances, and application of the supply in the determination of housing applications. Most importantly, paragraph 49 states:
 - a. “Relevant policies for the supply of housing should not be considered up-to-date if the local planning authority cannot demonstrate a five-year supply of deliverable housing sites”.
3. Planning Practice Guidance (PPG) ‘Housing and economic land availability assessment’ was issued by the government in March 2014 (and subsequently revised) and provides further information on how to identify and update a five-year supply.
4. This report sets out the Council’s assessment of whether there is a five-year supply of deliverable housing sites within the district in accordance with the NPPF and PPG. The report covers the five-year period from 1st April 2018 to 31st March 2023 and is based on housing land monitoring information as at 1st April 2018.
5. The assessment includes the following sources of housing supply to contribute to the five-year rolling supply of deliverable housing sites in the district:
6. Sites with outstanding planning permission at 1 April 2018;
 - Settlement extensions in Purbeck Local Plan Part 1: Planning Purbeck’s Future;
 - Settlement extensions in Swanage Local Plan.
 - Settlement extensions at Bere Regis to be allocated through Bere Regis Neighbourhood Plan; and
 - Settlement extensions at Wareham to be allocated through Wareham Neighbourhood Plan.

7. The assessment has three parts:

- Determine the housing requirement for the five year supply period (2018 – 2023);
- Establish the five year housing land supply for the supply period; and
- Assess whether the level of supply meets the housing requirement.

Five-year supply summary

8. Summary of the total number of dwellings that comprise the five-year supply:

Supply at 1st April 2018	Total
Outstanding planning permissions (includes 52 dwellings with outstanding planning permission at Swanage Grammar School site)	359
Bere Regis settlement extension	50
Lytchett Matravers settlement extension	50
Swanage settlement extension (excludes 52 dwellings with outstanding planning permission at Grammar School site)	148
Total	607

Determining the housing requirement

9. Purbeck District has an adopted (November 2012) Local Plan called the Purbeck Local Plan Part 1 (PLP1). Policy HS: Housing Supply of the PLP1 sets out a requirement for provision to be made for 2,520 dwellings to meet the district's housing need over the plan period 2006 – 2027. This is equivalent to 120 dwellings per annum. The policy distributes development across the district according to spatial area and in accordance with Policy LD: General Location of Development.

10. PPG (paragraph 30 Reference ID: 3-030-20140306) states that:

- a. "Considerable weight should be given to the housing requirement figures in adopted Local Plans, which have successfully passed through the examination process, unless significant new evidence comes to light".

11. The Inspector dealing with an appeal against the refusal of planning permission for the development of up to 35 dwellings at Prospect Farm, Swanage (Ref: APP/B1225/A/13/2198739, decision date 12th September 2014¹) endorsed the approach of relying on the housing requirements set out in PLP1:

- a. "The housing requirement figure used in the HSHT (Five-Year Housing Supply and Housing Trajectory) is based on the provision of 2,520 dwellings to meet housing needs over the period 2006-2027 set out in PLP Policy HS. This is equivalent to 120 dwellings per annum (2,520/21). Prior to its adoption the PLP was the subject of an Examination in Public (EIP) in May 2012. The EIP Inspector considered Policy HS in the context of the requirements of the Framework. He determined that whilst an early review

¹ <https://acp.planninginspectorate.gov.uk/>

of the Policy would be necessary with a view to adoption in 2017 and potentially increasing the provision for housing to around 170 dwellings per annum, PLP Policy HS provides an appropriate basis for planning in the District in the short-term, to 2017. At the Hearing the Council confirmed that the adoption of this plan has not been challenged. Furthermore, although a review has commenced, the outcome will not be known for some time. Under these circumstances, I consider the Council's use of provisions set out in PLP Policy HS as the starting point for its HSHT to be reasonable".

12. The Council began a review of PLP1 and its policies in November 2012 (known as the Local Plan Review). This review reflects concerns raised by the planning inspector of the PLP1 examination that the Council had not fully explored all housing growth potential in the district. The review therefore looks at the potential for higher housing growth in the district together with other updates to policies and the opportunity to introduce new policies, if necessary. Consultation on 'Issues and Options' took place from January to March 2015. Consultation on 'Options' took place from June to August 2016. Another consultation took place in January 2018 that focused primarily on housing policies and sites.
13. The review of PLP1 includes an update to the Council's evidence base. This includes a new Strategic Housing Market Assessment (SHMA) for all Dorset Councils in the Eastern Dorset Housing Market Area published in 2015. The SHMA looks at the district's objectively assessed housing needs and takes into account a variety of factors, such as population growth, household formation, and the need to maintain facilities and services by ensuring that there are enough homes to accommodate a working-age population. The SHMA also links to economic growth forecasts and jobs in accordance with PPG requirements.
14. The 2015 SHMA indicated that, in order to support the forecasted economic growth rates, the Council should deliver around 238 new homes per year between 2013 and 2033. As the Council is already planning for 120 homes per year up to 2027 in the PLP1 this would mean needing to find an additional 118 homes per year from 2013 onwards.
15. Following the options consultation, the Council undertook an update of the SHMA in 2017 which indicated a lesser need of 173 per year due to a reduction in anticipated economic growth.
16. In addition to this, a new housing methodology was released by the Ministry of Housing, Communities and Local Government that enabled local planning authorities to assess their own need. This methodology does not take into account economic projections.

17. The Council is currently working on its pre-submission local plan publication that is timetabled for October 2018. In the meantime, it is considered appropriate for the Council to continue to rely on the adopted PLP1 housing requirements for the purposes of this five-year housing land supply statement.

Establishing the housing supply

Outstanding planning permissions

19. The tables in the appendix provide a list of all outstanding planning permissions (dwellings under construction or with consent but not started at 1st April 2018), outstanding housing allocations in the PLP1, and council-owned land in PLP1. The list should be taken as evidence towards a deliverable five year housing land supply in accordance with paragraph 47 and footnote 11 of the NPPF:

- a. "Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented in five years, for example, there is no longer a demand for the type of units or sites have long term phasing plans".

Settlement extensions in PLP1

20. There are three allocated strategic settlement extensions in PLP1. The Council granted planning permission for 153 dwellings on land to the north of Worgret Road, Wareham in 2014. This development is now complete. Planning permission was also granted for 70 dwellings at Policeman's Lane, Upton and this has now completed. There is one remaining strategic settlement extension that does not have planning permission (at 1st April 2018):

- Huntick Road, Lytchett Matravers (approximately 50 dwellings).

Determination of this application is ongoing in relation to this site and there is no evidence to suggest the site will not come forward within the 5-year supply period.

21. PLP1 sets out that other plans will identify and deliver the district's non-strategic settlement extensions:

- Bere Regis Neighbourhood Plan (approximately 50 dwellings).

Bere Regis Neighbourhood plan has not been 'made' (adopted) yet, but the Neighbourhood Plan Steering Group has undertaken a significant level of work on the plan. As such, it is considered likely that 50 dwellings will be provided as settlement extensions in Bere Regis within the 5-year period.

- Swanage Local Plan (approximately 200 dwellings).

The Swanage Local Plan was adopted in June 2017. It allocates settlement extensions for 200 dwellings. Of these, outline planning permission was granted for 52 dwellings at the former Grammar School Site in 2014 (included under outstanding planning permissions). There is no evidence to suggest the remaining 148 dwellings will not be deliverable within the five year period.

22. The total number of homes in the five-year supply from settlement extensions is 248 dwellings.
23. The appendix provides full details.

Council-owned land in PLP1

24. PLP1 includes two sites of council-owned land within the overall housing supply.
25. Policy HS identified the site at Pound Lane, Wareham as a supply of 10 dwellings. The Council granted planning permission for 21 sheltered apartments for the elderly in July 2014, and the site is now complete.
26. Policy HS identified the site at Kings Road Depot, Swanage as a supply of 40 dwellings. This site is included in the Swanage Local Plan for a range of potential uses, including residential. However, a lack of certainty of the mix of uses to be delivered on the site mean that the supply has not been taken into account when calculating the 5 year supply.
27. The total number of homes in the five-year supply from council-owned land is 0 dwellings.

Assessing the five-year supply 2018

Calculating the five-year housing requirement

28. The Council must demonstrate a five-year supply of housing sites, in accordance with paragraph 47 of the NPPF. We have calculated the five-year housing requirement for the period 2018 – 2023 as follows:

a. Housing Requirement 2006-2027	21 years	2,520 dwellings
b. Completions 2006-2018	12 years	1,600 dwellings
c. Outstanding Requirement 2018-2027	9 years	920 dwellings
d. Outstanding Annual Requirement		102.2 dwellings

29. The Council must also include a 5% buffer to ensure choice and competition in the housing market (paragraph 47 of NPPF). A 5% buffer of the outstanding annual requirement dwellings would be 25.6 dwellings over five years. With our 5% buffer, we therefore need a total supply of 536.7 dwellings over the five-year supply period.

30. This results in a revised annual housing requirement of 107.3 dwellings.

Total housing supply required (2018-2023)	536.7 dwellings
Annual housing supply required (2018-2023)	107.3 dwellings

Calculating the five-year housing supply

31. This assessment has identified the following five-year housing supply (the evidence of which can be found in the appendix) at 1st April 2018:

a. Outstanding planning permissions	359 dwellings
b. Settlement Extensions	248 dwellings
c. Council-owned land in PLP1	0 dwellings
d. Total Supply	607 dwellings
e. Available Supply (Years)	5.7 (607/107.3)

32. We are able to demonstrate a total five-year supply of 607 dwellings. This is a supply of 5.7 years.

Total five-year housing supply (2018-2023)	607 dwellings
Total supply in years	5.7

Housing trajectory

33. The Council is required to achieve 120 dwellings per year over the plan period 2006 – 2027. This will provide a total of 2,520 dwellings in accordance with PLP1 Policy HS.

34. In fact, over the first eleven years (2006 – 2018) we have achieved 1,600 dwellings, which means that we are ahead of our housing trajectory by 160 dwellings.

35. As the graphs above show, in the first few years of the local plan and during 2015-16 monitoring year, we consistently achieved more than our target of 120. Whereas during 2010 – 2014 and in 2016, we were below target.

36. During the first few years of the trajectory, the 2004 Local Plan allocation at Purbeck Gate (Wool) was still under construction. Following completion of this allocation, the district had no further housing allocations to provide supply until the council adopted the new local plan (PLP1) in November 2012.

37. The housing allocations in PLP1 are almost complete with 153 dwellings at Worgret Road, Wareham having recently completed work as well as Policeman’s Lane, Upton.

38. During the recession fewer houses were completed. However, we have continued to maintain our five-year housing land supply and expect to see an increase in delivery as the economy recovers. Further allocations have also been adopted in the Swanage Local Plan, adopted in 2017, that allocates 200 units. Also two neighbourhood plans are currently consulting on pre-submission drafts of their plans that seek to deliver settlement extensions at Bere Regis and Wareham.

Summary of 2018

39. Based on the five-year supply assessment, a supply of 548.1 dwellings is required over the 5-year period 2018-2023 at an annual average requirement of 107.3 dwellings.
40. The identified five-year housing supply of 607 dwellings is sufficient to provide a 5- year housing land supply. In fact, the assessment confirms that even with a 5% buffer, Purbeck is able to provide a 5.7 year land supply to meet the five-year housing requirement.
41. The housing trajectory illustrates how Purbeck has historically delivered more than its 120 dwellings per annum housing target. However, the recession and lack of housing allocations prior to adoption of PLP1 saw a reduction in supply. We now expect to see an increase in the delivery of housing sites over the remainder of the plan period as the housing allocations in PLP1 are built out, new allocations are delivered through Swanage Local Plan and Neighbourhood Plans, and the economy makes a recovery.
42. The Council will review the five-year housing land supply assessment and housing trajectory annually in accordance with updates to the housing land monitoring data.
