A study report by
Fisher Associates (September 2009)
for
Dorset AONB and Jurassic Coast Transport Working Group

This report was commissioned by the Dorset Area of Outstanding Natural Beauty (AONB) to investigate potential for waterborne transport along the Dorset and East Devon Coast which would offer an enhanced, reliable and realistic alternative transport opportunity for both functional and leisure journeys, and would enable integration between waterborne and surface transport.

The Steering Group for this project comprised representatives from Dorset AONB, the Jurassic Coast Team, Devon and Dorset County Councils and the Jurassic Coast Trust.
