

Part 7: Historic Environment Research Framework

The collation of the information on the development and character of the town has highlighted a number of areas where our understanding of the town is deficient. This has led to the formulation of the research questions set out below, which summarise potential future directions of research on the town. This list is neither exhaustive nor prescriptive, but suggests a framework within which further research could take place and this is linked to the South West Regional Archaeological Research Framework (Webster 2008), where relevant.

7.1 Medieval Town

The crucial research questions about Newton, Studland reflect our uncertainty of the location of the town and its status. Research into this

has potential to provide information to inform on a wider Research Aim for the South West Region to improve our understanding of Medieval and later urbanism (SWARF Research Aim 36).

- 1 Where is the location of the town of Newton?
- 2 How large and what was the layout of the town?
- 3 How much of the town was physically laid out and occupied? What form did this take?
- 4 When was the town abandoned or dwindle into a farmstead?
- 5 What date are the ditched enclosures to the west of Newton Cottage?
