

Part 7: Historic Environment Research Framework

The collation of the information on the development and character of the town has highlighted a number of areas where our understanding of the town is deficient. This has led to the formulation of the research questions set out below, which summarise potential future directions of research on the town. This list is neither exhaustive nor prescriptive, but suggests a framework within which further research could take place, and this is linked to the South West Regional Archaeological Research Framework (Webster 2008) where relevant.

7.1 Pre-urban Activity

Whilst the wider prehistoric and Roman setting of Cranborne Chase has been very well researched and studied since at least the early 19th century, the pre-urban context of the town of Cranborne itself is very poorly understood. Thus, the questions on pre-urban activity are very general.

1. What is the nature of the prehistoric activity in the immediate vicinity of the town and how does this relate to ritual and funerary activity on Cranborne Chase?
2. Where are the late prehistoric, Roman and middle Saxon dispersed settlements?
3. Can the late Bronze Age field alignments excavated at Cranborne Ancient Technology Centre be related to modern NNE-SSW aligned field boundaries in the Allen valley to the south west of Cranborne? And do these alignments have any bearing on the layout of town?
4. What was the nature of the palaeo-environment in the prehistoric, Roman and middle Saxon periods?

7.2 Origins of the Town

The question of the origins of Cranborne is crucial to our understanding of the town and its early development. Also Cranborne has real potential to inform on a wider Research Aim for the South West Region to develop our understanding of the origins of villages (SWARF Research Aim 33).

5. Does the site of King John's 13th century hunting lodge overly the site of the late Saxon manor and does this represent the primary settlement component of the town?
6. If the manor site is the earliest settlement component, was it established at the crossing of a prehistoric N-S route over the River Crane? And if so, what was the original course of this route through the later town?
7. If the late Saxon settlement of Cranborne

was centred on the abbey church and manor, was there any settlement to the north of the manor house, west of the current village centre at that time?

8. Is the site of the priory and parish church of St Mary and St Bartholomew also the site of the late Saxon Benedictine Abbey of Cranborne? And if so, are there any structural remains of the abbey?
9. What is the context of the discovery of the 9th century carved stone fragment from the manor fishpond? Was this the site of an early church, manor or mill? Can any other structural remains be found here?
10. Was there a pre-existing dispersed settlement pattern in the upper Crane valley as suggested by middle Saxon finds at Penny's Mead?
11. What was the nature of the palaeo-environment in the late Saxon period?

7.3 Medieval town

Any archaeological evidence from the town at this period enables a fuller picture of its development and complements the historical evidence. It would feed into the wider Research Aims for the South West Region to improve our understanding of Medieval and later urbanism (SWARF Research Aim 36) and assessment of the archaeological potential for studying medieval economy, trade, technology and production (SWARF Research Aim 47).

12. How did the town develop? Was the medieval market place established to the east of an earlier settlement north of the Manor?
13. Were the High Street plots established as regular burgages following the establishment of the market place? And can these burgages be defined by the supposed back lanes of Grugs Lane, Castle Street and Church Street?
14. What evidence is there for the medieval economy?
15. What evidence is there for medieval industry and how was it organised?
16. To what extent was the town's economy dependant upon royal patronage during this period?
17. Are there any traces of medieval buildings hidden within later buildings?
18. How well are the remains of the priory buildings preserved, and what is their exact location?

7.4 Post-medieval and Modern town

Any archaeological evidence from the town at this period enables a fuller picture of its development and complements the historical evidence. It would feed into the wider Research Aims for the South West Region to improve our understanding of Medieval and later urbanism (SWARF Research Aim 36) and to broaden our understanding of post-medieval to modern technology and production.

19. How did the dissolution of Cranborne Priory affect the economic development of the post-medieval town?
20. How was the industrial activity of the town organised and how did it develop?
21. What physical traces of the industrial activity of the town still survive? Are there any remains of former ribbon weaving works, and their ancillary buildings and structures?
22. Did the creation of the Blandford to Salisbury turnpike precipitate the decline of Cranborne as a regional market and administrative centre, leading it to ultimately fail as an urban economic centre and enter steep decline?
23. What evidence can the standing secular buildings provide for their function and date?

Appendix 2: Chronology

For the purposes of this project, the following period names, sub-divisions and dates have been used. These are based on those used by the Dorset County Council Historic Environment Record.

Period	Period Sub-divisions	Date Range
Prehistoric	Palaeolithic	500000-10001BC
	Mesolithic	10000-4001BC
	Neolithic	4000-2351BC
	Bronze Age	2350-701BC
	Iron Age	800BC-AD42
Roman	Roman	AD43-409
Saxon	Early Saxon	AD410-899
	Late Saxon	AD900-1065
Medieval	Norman	AD1066-1149
	Earlier Medieval	AD1150-1349
	Later Medieval	AD1350-1539
Post-medieval	Early post-medieval	AD1540-1599
	17 th Century	AD1600-1699
	18 th century	AD1700-1799
	Earlier 19 th century	AD1800-1850
	Later 19 th century	AD1851-1900
Modern	Edwardian	AD1901-1913
	Inter-war	AD1914-1945
	Post-war	AD1946-1969
	Modern	AD1970-2010

Appendix 3: Archaeological Investigations in Cranborne

No.	Site Name	Investigation type	Date	Reference	HER Event No.
1	Cranborne Lodge	observation	1841	Wake Smart 1983, 13	EDO5291
2	150 yards NW of Cranborne Church	findspot	1935	RCHME, 1975, 5	EDO5290

6	Penny's Mead	evaluation	1987	Wilson and Chowne 1987, 2	EDO318
7	Penny's Farm	evaluation	1992	Bellamy 2000	EDO291
8	Penny's Farm	excavation	1996	Bellamy 2000	EDO5287
9	Cranborne Ancient Technology Centre	excavation	2000	Heaton <i>et al.</i> 2000	EDO5286

Appendix 4: Historic Urban Character Types

Broad Type	Character Type	Scope Note
Commercial	Hotel	Large hotels in grounds with car parks.
	Market	Both indoor and outdoor market areas. Also used for historic market places.
	Office	Large office complexes that are identifiable as not being within a mixed use area.
	Offices and shops	Areas of mixed commercial use.
	Plant Nursery/ Garden Centre	Plant nurseries or garden centres covering large areas.
	Public house	Large public houses with car parks. Smaller public houses will be included under a more character dominant type.
	Retail park	Areas of large warehouse-type shops selling products such as furniture, white goods, etc, together with their car parks.
	Shopping centre	Shopping centres mainly out of town and with many small units, usually selling clothing, gifts etc.
	Superstore	Large single stores such as supermarkets and their car parks.
	Other commercial site	For commercial buildings of unknown use or not included in the categories above.
Communication	Airfield	An enclosed area used for the taking off, landing and maintenance of commercial and general aviation aircraft.
	Major road	Main roads, through routes, by-passes, etc
	Minor road	Minor roads linking the main roads.
	Lane/ Path	Smaller access ways, primarily used for historic routes.
	Car Park	Large car parks, including multi-storey, where not associated with a particular establishment.
	Bus Station	Large bus and coach stations.
	Railway	Current railway lines
	Railway (disused)	Lines of former railways, where these are still evident in the landscape.
	Railway Station	Railway stations which have a large impact on the landscape.
Railway Yard	Rail yards which have a large impact on the landscape.	
Industrial	Brewery	Large industrial brewery sites. It can also be used for former brewery sites converted to other uses, where the former brewery buildings remain dominant.
	Brickworks	Includes both brick and tile works.
	Engineering works	All engineering works including light and electrical engineering sites.
	Industrial Estate	Sites comprising small units of light industry, including sites described as 'Business Park' and 'Trading Estate' and primarily used for purpose-built industrial estates. Where industrial estates have been created by conversion of former industrial buildings, they have been characterised under the character type which reflects their original function, if this is still dominant.

Broad Type	Character Type	Scope Note
Industrial (cont)	Maltings	Malthouses and small brewing sites.
	Metal works	All sites working and/or producing metal.
	Mill	All types of water mill.
	Pottery	Industrial site used for the production of industrial and domestic ceramic products.
	Quarry	Includes all extractive industries (stone, sand and gravel, clay, etc.)
	Quay/wharf/shipyard	Commercial shipping areas, including boatyards.
	Ropery	All rope and twine making sites, including rope walks, etc
	Textile works	Factories where textiles are manufactured.
	Timber Yard/ Saw mill	Large timber yards and/or sawmills.
	Workshops	An area of small industrial sites where the industry is unknown.
	Warehouse	Large storage buildings, including both historic warehouses (which may have now been converted to other uses) and modern warehouse sites.
	Other Industry	An area of industry which does not fit into any of the above.
Landscape	Beach	A sand or pebble area of the shore.
	Enclosed Fields	Enclosed fields which largely retain their original boundaries within an urban area.
	Fish Pond	Large areas of fish pond only.
	Pond	Smaller natural or artificial areas of water, including mill ponds.
	Paddocks and closes	Small regular or amorphous fields and plots close to settlement edge. It also includes areas of historic detached gardens within the urban landscape.
	Remnant Fields	Areas of former fields now enclosed by urban development, often no longer retaining their original shape or size.
	Scrub	Patchy areas of trees and shrubs.
	Unenclosed land	Unenclosed areas including small plots of land within settlement/industrial areas that are not defined as anything else.
	Wood	For all types and areas of woodland within the urban areas.
Military	Military Airfield	Enclosed area used for the taking off, landing and maintenance of military aircraft.
	Barracks	A building or building complex used to house soldiers.
	Depot	An enclosed area with numerous buildings used as the headquarters of a regiment. It can also be a dedicated stores facility.
	Town defences	Town walls, towers, bastions, and defensive earthworks associated with a town
	Territorial Army Centre	Sites of Territorial Army activity.
	Castle	A large fortified building or complex of buildings, built especially during the medieval period
	Other Military	An area of military activity which does not fit into the above.

Broad Type	Character Type	Scope Note
Public Services	Art gallery	Large art galleries and their grounds.
	Community Centre	Includes all kinds of gathering places (Meeting hall, etc).
	Court Building	Crown Courts and Magistrates Courts.
	Emergency services building	Police stations, fire stations, ambulance stations, and coastguard stations, where free-standing and in their own grounds.
	Higher Education facility	For universities & college campuses - also adult education facilities.
	Library	Large libraries.
	Local Government Offices	All local government and central government offices including civic centres.
	Medical facility	All types of medical facility including hospitals, health centres, etc.
	Museum	Large museums
	Prison	For buildings marked 'Prison'
	Public building	Other non-specific public buildings.
	School	Use for schools and any associated playing fields.
Town hall	Town Halls	
Recreation and Ornamental Landscapes	Allotments	Large allotment areas within settlement areas.
	Camping Site	A usually fairly level area used for the pitching of tents or the parking of caravans for holiday use.
	Cinema	Large cinema complexes and their car parks.
	Deer Park	An area enclosed by a park pale for the stocking of deer.
	Golf Course	Landscaped areas used for playing golf, including club-houses, etc.
	Harbour/marina/dock	Areas for recreational boat use.
	Leisure Centre	Building used for various sports, including area of car park.
	Nature Reserve	An area designated for the protection of flora and fauna, often open to the public.
	Parkland	A landscape designed through judicious planting or clearance of trees in order to create vistas and usually associated with a Country House
	Public Open Space	Publicly accessible open areas not used for any specific activity.
	Public Park	For Public Parks and Gardens, larger areas of land which may include an ornamental lake, flower beds, tennis courts and play areas, etc. Also includes 'Recreation areas'.
	Racecourse	An enclosed area used for racing (horses, dogs, cars, etc.)
	Seafront	Sea side area used for public recreation, includes piers, promenades, etc.
Sports field	An area of ground used for organised sporting activities.	

Broad Type	Character Type	Scope Note
Recreation and Ornamental Landscapes (cont)	Theme Park	An area used for the recreation of the public and may include rides which is organised around a central theme.
	Other Recreation	An area of recreation/ornamental landscape, which does not fit into the above.
Religious	Church	Churches of all denominations (including attached churchyard)
	Chapel	Non-conformist chapels, including attached graveyards.
	Cemetery	Large municipal cemeteries or other detached cemeteries (not attached to church or chapel)
	Religious house	Monasteries, nunneries, etc
Settlement	Burgage plots	Long narrow plots running back from the street frontage, of medieval origin.
	Other historic plots	Areas of historic plots other than burgage plots of pre-19th century date.
	Historic suburban settlement	Areas of settlement dating from before the 19th century, which lay outside the core of the medieval town.
	Historic rural settlement	Former villages, hamlets, etc, which have been incorporated into urban areas, usually medieval in origin.
	Apartments	Housing of not more than three or four storeys, also includes maisonettes.
	Small terraced and detached housing (1700-1850)	An area where historic terraced houses (defined as a row of three or more houses) or detached houses of late 18th and early 19th century predominate. The houses have an average footprint of about 50 square metres or less.
	Larger terraced and detached housing (1700-1850)	An area where historic terraced houses (defined as a row of three or more houses) or detached houses of late 18th and early 19th century predominate. The houses have an approximate average footprint of greater than 50 square metres.
	Victorian Terraced housing	An area where historic terraced houses (defined as a row of three or more houses) of late 19th century date (1850-1900) predominate.
	Edwardian terraced housing	An area where historic terraced houses (defined as a row of three or more houses) of early 20th century date (1901-1913) predominate.
	Suburban villas	Areas of predominantly detached and semi-detached housing set in their own grounds and often in a planned layout built pre-1914.
	Inter-war suburban estate	Planned areas of mainly detached and semi-detached houses, dating to the period 1914-1945.
	Other Inter-war housing	Other areas of housing dating to 1914-1945 not part of larger suburban estates.
	Modern housing estate	Planned estates of mainly detached and semi-detached houses, often with curvilinear roads and culs-de-sac, dating to post-1945.
	Modern Infill	Planned areas of mainly detached and semi-detached houses, inserted into existing established plots (often in the grounds of larger houses), dating to post-1945.
	Town House	Large single detached urban house
Ornamental villas and country houses	Ornamental villas are large detached houses in large grounds, usually 19th/early 20th century in date. Country Houses are large houses, sometimes with a landscaped garden, in or once in a rural area, usually dating from the medieval to the 18th century.	

Broad Type	Character Type	Scope Note
Settlement (cont)	Farm	Farm buildings and farmhouse, but can include the immediate adjacent farmyard or paddocks.
	Cottages	Small buildings - sometimes singular, sometimes in a row. They are smallish buildings of irregular shape.
	Nursing Home	Residential homes for the elderly.
Utilities	Gas works	Areas of gas works, including gas holders, etc.
	Power station	Power stations - either electric or gas
	Sewage works/ water works	Sewage works, filter beds, water works, pumping stations, etc.
	Sub station	Large electricity sub stations only.
	Telephone Ex- change	Large telephone exchanges.

Appendix 5: Archaeological Potential

The measure of urban archaeological potential is based on a consideration of the likely time depth of the potential archaeological remains, the potential survival of these remains, an assessment of the potential diversity of features present and an indication of the likely significance of the information to the history of the town.

These are scored numerically to calculate the final index of urban archaeological potential.

Score	1	2	3
No. of chronological periods of urban development	1-4	5-10	11+
Survival of archaeological deposits	Low	Medium	High
Potential diversity of features present	Low	Medium	High
Significance to town	Low	Medium	High

Overall Archaeological Potential	Low	4-6
	Medium	7-9
	High	10-12

Notes:

1. The chronological periods are those used by the Dorset Historic Towns Project.
2. The index of survival of archaeological deposits is a generalised index of the likely quality of survival of archaeological features based on the example of excavated sites, where possible, otherwise an assessment will be made on the basis of topography, geology and amount of development.

Low survival is where there is likely to be major truncation and/or destruction of deposits and features through modern landscaping and development and/or soil and geological conditions that indicate likely poor survival of archaeological material, particularly organic materials and metals.

Medium survival is where there is likely to be some truncation and/or destruction of deposits and features through modern landscaping and development and/or soil and geological conditions that indicate likely moderate survival of archaeological material.

High survival is where modern landscaping and development is unlikely to have caused significant truncation and disturbance of archaeological deposits and features and/or soil and geological conditions that indicate good survival of archaeological material, particularly organic materials and metals.

3. The potential diversity of archaeological features is a generalised index of the likely range of archaeological features, deposits, finds and historic buildings based on the example of excavated sites where possible, otherwise an assessment will be made on the basis of archaeological evidence from similar areas in the town or from similar towns elsewhere in Dorset.

Low diversity is where there is likely to be a very limited range of archaeological evidence, reflecting either a limited range of activities or marginal areas with overall low level of activity.

Medium diversity is where there is likely to be a range of different types of archaeological finds, features and deposits, either reflecting areas of limited range of activities or areas on the margins of settlement focus.

High diversity is where there is likely to be a wide range of different types of archaeological finds, features and deposits, including structural remains, pits, evidence of craft and industrial activity, etc, and also standing historic buildings, reflecting mainly historic town centre locations.

4. The index of significance to the town is a generalised index of the potential of the archaeology to provide significant data to inform

Low significance is to be used primarily for areas of relatively recent suburban development.

Medium significance is to be used primarily for areas of historic development outside the historic core of the town.

High significance is to be used primarily for areas in the historic core of the town.
